

Turkey Season Road Closures for Walk-in Hunting Areas:

During LBL's spring turkey hunting season various roads are closed to vehicle traffic to provide walk-in areas for hunters. This has been continued through the years at the request of hunters desiring to hunt less disturbed hunting areas. Most of the roads selected access some of the more remote areas and receive minimal maintenance.

Hunters should note that just because a walk-in road is closed to most vehicles, limited authorized use may still occur, such as cemetery or administrative access.

Hunting within 150 yards of these temporarily closed roads is still illegal. Also, vehicles found bypassing roadblocks without proper authorization will be ticketed.

These roads normally remain barricaded from 2 days before the first quota turkey hunt until 2 days or less following the end of LBL's spring turkey season.
